ABOUT

Full-stack MERN Developer (Frontend-focused, Backend-ready) with hands-on experience in React, TypeScript, and REST API integration. Currently expanding expertise into backend technologies like Node.js, Express.js, and MongoDB. Passionate about building scalable, maintainable applications and continuously improving technical skills.

SKILLS

Languages: JavaScript (ES6+), TypeScript.

Backend: Node.js, Express.js, MongoDB.

Frontend: React.js, Redux Toolkit (RTK), Tailwind CSS, Material UI, Bootstrap.

Tools & Platforms: Git, GitHub, GitLab, CI/CD pipelines, Jest, Postman, Jira, Figma.

PROFESSIONAL EXPERIENCE

Recruiter – LanceSoft Inc. (Dec 2025 – April 2026)

- Managed end-to-end recruitment for US healthcare professionals
- Sourced, screened, and coordinated candidates through the hiring pipeline.

Associate Software Engineer – GammaEdge Technologies (Mar 2025 – Oct 2025)

- Developed production-ready, responsive UIs using React, TypeScript, and Material UI.
- Integrated backend APIs for seamless data retrieval and updates.
- Collaborated closely with backend developers to optimize API structure and performance.
- Used GitLab and CI/CD pipelines for deployment and version control.

MERN Stack Intern-fulltime – Startappss System (Sept 2024 – Jan 2025)

- Designed and implemented REST API integration between frontend and backend services.
- Built responsive UI components in React.js and Tailwind CSS.
- Participated in Agile sprints, working on both frontend and backend enhancements.

PROJECTS

NETFLIX-GPT – Movie Recommendation | React.js, JavaScript, Redux, Toolkit, Tailwind, CSS, Firebase

- Built a Netflix-inspired movie streaming interface with reusable React components and responsive UI.
- Implemented Firebase Authentication for user sign-up, login, profile management, and protected user flows.
- Integrated TMDB APIs to fetch movie data, trailers, and dynamically rendered content.
- Used Redux Toolkit for global state management and implemented a GPT-powered movie search/recommendation interface.
- Deployed the application using Firebase Hosting.

Dev Tinder Clone (Full-stack Project – In Progress) | React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Developed a full-stack developer networking application using React.js, Node.js, Express.js, and MongoDB.
- Implemented JWT-based authentication and authorization with protected routes and middleware.
- Built user registration, login, profile management, and developer connection/request features.
- Designed and integrated RESTful APIs with CRUD operations and MongoDB for data management.
- Deployed the application on AWS and tested APIs using Postman.

EDUCATION – B-tech (Computer Science), SDBCT, Indore (2020-2024).
