

NIRMAL KANDEL

MERN Stack Developer | Full Stack Developer

Indore, India | +91 8349692155 | nirmalkandel001@gmail.com

Portfolio: nirmal-portfolio-eta.vercel.app | LinkedIn: linkedin.com/in/nirmal-kandel | GitHub: github.com/NIRMALKANDEL

SUMMARY

MERN Stack Developer with industry experience building production-ready, responsive web applications using React, TypeScript, Node.js, Express.js and MongoDB. Experienced in REST API design and integration, JWT authentication, Redux Toolkit state management and CI/CD-based deployment. Uses AI-assisted development (Claude Code) to ship features faster while keeping code clean and maintainable.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, React Router, Tailwind CSS, Material UI, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication, NextAuth.js, bcrypt

Database: MongoDB, Mongoose, MongoDB Atlas

Tools & Platforms: Git, GitHub, GitLab, CI/CD, Postman, Vercel, AWS, Firebase, Jest, Jira, Claude Code

PROFESSIONAL EXPERIENCE

Associate Software Engineer - GammaEdge Technologies

- Developed production-ready, responsive user interfaces using React, TypeScript and Material UI.
- Integrated backend REST APIs for seamless data retrieval and updates across application modules.
- Collaborated closely with backend developers to optimize API structure and performance.
- Used GitLab and CI/CD pipelines for version control and deployment.

MERN Stack Intern (Full-time) - Startappss System

- Designed and implemented REST API integration between frontend and backend services.
- Built reusable, responsive UI components with React.js and Tailwind CSS.
- Participated in Agile sprints, delivering both frontend and backend enhancements.

PROJECTS

DevTinder - Developer Networking Platform

projectdev.in

React, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, JWT, AWS

- Built a full-stack MERN app where developers discover profiles, send connection requests and connect.
- Implemented JWT auth with httpOnly cookies, bcrypt password hashing and middleware-protected routes.
- Designed RESTful auth, profile, request and user APIs with Mongoose; managed client state with Redux Toolkit.
- Deployed the application on AWS and tested all APIs using Postman.

Paylog - Personal Finance Tracker (Web, Android, iOS)

devnirmal.pythonanywhere.com

Python, Flask, SQLite, REST API, React Native, Expo, TypeScript, Chart.js, GitHub Actions

- Built a cross-platform expense tracker with AI-assisted development (Claude Code): one backend serves the website and a JSON REST API for the mobile app.
- Implemented expenses, income, budgets, savings goals, recurring transactions, analytics charts and plain-text quick entry (e.g. "250 lunch").
- Added receipt scanning and an Android home-screen widget that saves entries offline and syncs later.
- Secured mobile sign-in with 30-day tokens stored in Keystore/Keychain (only SHA-256 hashes on the server); CI runs tests on every push.

Netflix GPT - AI Movie Recommendation App

netflix-gpt-d8cfb.web.app

React, Redux Toolkit, Tailwind CSS, Firebase Auth, TMDB API, Gemini API

- Built a Netflix-style streaming UI with Firebase Authentication, protected routes and live TMDB movie data.
- Added AI-powered natural-language movie search using the Gemini API to recommend movies from plain-English queries.
- Managed auth, movies and search state with Redux Toolkit and custom hooks; deployed on Firebase Hosting.

EDUCATION

B.Tech, Computer Science Engineering - SDBCT, Indore (RGPV University)

2020 - 2024
